

CELEC P100

POWER CABLE PROTECTIVE PRODUCT

Specialities

Description

Repsol offers a carefully selected choice of products (greases) for protection of low-, medium- and high-voltage power cables with the generic name CELEC. The range of products CELEC are complex product mixtures based on mainly oil-derived products (petrolatum) which are modified with different additives that grant them excellent properties of anchorage to metallic surfaces, electrical isolation and metal protection outdoors, even in extreme conditions, which in addition to its high durability assures a correct protection of the power cables during long periods.

Based in Norm UNE EN 50326, CELEC P100 is a type B grease applied with heating and has the designation 20B105.

Applications

This grease acts as an electrical insulator, anti-corrosion and anti-wear agent on bare overhead lines conductors made of aluminium, aluminium alloy, steel wires or a combination of these wires (ACSR).

Technical Characteristics *

	UNITS	METHOD	CELEC P100
Melting Point	°C	ASTM D127	105-115
Drop Point	°C	ASTM D566 / ISO 2176 EN 50326 (6.5)	≥ 105
Penetration at 25°C	mm/10	ASTM D937 / ISO2137 EN 50326 (6.8)	20-45**
Viscosity at 120°C	cSt	ASTM D445	≤ 25
Fluency and Separation (50°C, 24h)	-	IEC-811-5-1	Pass
Dielectric constant at 23°C	-	ASTM D-150	≤ 2.3
Volume Resistivity at 23°C	Ohm cm	ASTM D-257	> 1E+14
Aging/Corrosion		EN 50326 (6.12.2)	Pass
Flexibility and folding at -20°C		IT-LAB-141 EN 50326 (6.9)	Pass
Colour	-	ASTM D-1500	L5,5
Acidity index	mg KOH/gr	IT-LAB-185 EN 50326 (6.10.3)	≤ 0.5
Flash Point O.C.	°C	ASTM D-92	≥ 280

** The penetrability test does not meet the criteria established in the aforementioned standard to being a product in form of plates.

Presentation

5 kg slabs in 25 kg boxes.
